Novelties and Specialties in FLOWER SEEDS

The florist who fails to pay special attention to the many splendid new flowers misses a wonderful chance to present to his customers many worth-while new things which always sell well and usually bring a price considerably higher than that procurable from ordinary flowers. The novelties which we have grouped together on these pages are all outstanding in one way or another. No florist can afford to pass them by. They represent the finest of the new things for 1939; but there also are the best newer kinds of recent years. Take advantage of the opportunity to offer to your customers these new and improved varieties.

New Rustproof Antirrhinum

New Rustproof Antirrhinum

The careful work done in order to develop these strains of Rustproof Antirrhinum has proved a tremendous success as now it is possible to grow these flowers with the assurance that fully 75% of the plants will not be affected by Snapdragon rust.

Maximum Varieties

This strain has proved one of the most popular because of its vigorous growth and showy appearance. The plants reach a height of 3 feet and more with mammoth blooms artistically arranged on fine, strong, and long flower spikes. There are now available a number of very choice colors.

Alaska. A very attractive variety, and more floriferous than Maximum Snowflake, bearing 12 to 14 base-branching flower spikes set with lovely white blooms of enormous size.

Campfire. This is a distinct new color in Antirrhinum—a pure luminous scarlet, free from any orange or bluish shades.

Copper King. Each plant carries 12 to 16 long vigorous spikes set with magnificent blooms in varying shades of copper, ranging from coppery old gold to brilliant copper-orange.

Crimson. The combination of fiery crimson flowers, dark green foliage, and dark plum-colored stems is indeed very striking. A vigorous grower.

Loveliness. Pure soft rose-pink blooms that are an expression of loveliness. Produces 12 to 16 splendid spikes to a plant.

Yellow Giant. Vigorous plants having 12 to 14 non-lateral stems closely set with glistening deep yellow blooms.

Majus grandiflorum—Rustproof

Dreer Quality VEGETABLE SEEDS for Market Gardeners

Every successful market grower realizes the tremendous importance quality seeds play in the production of profitable crops. The market gardener who makes his livelihood from the sale of the produce grown cannot afford to sow seeds of doubtful value. He must have highly bred strains carefully selected from vigorous parent plants that show all the typical characteristics of the true variety. They must be full of vigor and vitality to make a sturdy growth from the start. More than three generations of market growers have realized that they can depend on Dreer's to supply them with the finest in Vegetable Seeds.

Our list of varieties includes the choicest strains of all the best standard sorts but we recommend particularly making thorough trials of the many new varieties because they have proved superior in many sections. Higher yields, better quality, and disease resistance are important factors that distinguish many of the newer varieties.

DREER'S SELECT DAHLIAS

For some years now there has been a strong and distinct trend toward Miniature Dahlias on account of their usefulness for home and garden decoration. We therefore have given special attention to these small-flowered types as we believe their popularity will increase still further as soon as the public becomes more fully acquainted with their possibilities.

Miniature Dahlias

The ideal type for home decoration since it makes up into graceful baskets and vases. The blooms are less than 3½ inches in diameter and they are borne on compact plants of moderate height with the flowers displayed on good wiry stems. They come in both Decorative and Cactus form.

Aberdeen. Graceful plants growing to a height of about 3 ft., producing an abundance of deep crimson flowers of Cactus form.

Anna Lee. Deep carmine flowers of perfect Formal-Decorative form.

Baby Royal. Semi-Cactus. The flowers are bright salmon-pink shaded with apricot and displaying a rich yellow tone at the base of each petal. Very popular.

Baby Sagamore. A model of perfection with lovely Formal-Decorative blooms of a bright golden yellow color carried on extra-long stems. Blooms continuously from early in the season until frost.

Bishop of Landaff. The sensational effectiveness of this charming decorative variety has made it one of the most popular sorts for garden and cutting purposes. The bright scarlet flowers with deep garnet center harmonize wonderfully well with the deeply lacinated dark bronze foliage. You need this to attract attention. Of duplex form.

Corinna. Perfectly formed, pure yellow Formal-Decorative. One of the best in the collection and the only pure yellow. Unsurpassed for the garden and for cutting.

Donau. Dainty soft silvery rose flowers produced freely on strong wiry stems. Decorative.

Elizabeth Pape. Cactus type producing old rose and tan flowers.

Fairy. An extremely floriferous Formal-Decorative variety of a pleasing deep pink color. The base of the petals is yellow, which lights up the flowers and gives them added charm.

Irene. Decorative. Unique peach pink blooms.

Leiden's Miniature. Salmon-rose blooms on wiry stems. Cactus.

Little Jewel. A popular light pink Decorative variety of dainty form and coloring.

Mah Baby. Dark crimson, almost black, of Formal-Decorative type.

Marcellette. Formal-Decorative of a deep salmon flesh or fawn color. Very floriferous and long-stemmed.

Any of the above, strong divisions of field-grown roots: 25c each; \$2.50 per dozen; \$15.00 per 100.

Nesthaekchen

Nesthaekchen (Nestling). This has been one of our favorites for a number of years. The flowers are a trifle larger than an ideal Miniature. The general color effect is a delicate rose. Blooms very freely and has strong wiry stems. Cactus.

Paddy. Bright flesh pink Decorative flowers of neat size. Blooms profusely and is most reliable.

Persimmon. A perfect Formal-Decorative with the flowers produced on strong wiry stems. The color is deep rosy persimmon.

Red Head. Of unique Formal-Decorative form. A striking bright red flower.

Roeschen. Very satisfactory deep pink Formal-Decorative of excellent form and habit.

Sannican's Sweetheart. Very free flowering Cactus of a clear yellow suffused with red. Our fields of this variety were a mass of bloom from early in the season until digging time. Very useful for cutting.

Dainty Pompon Dahlias

The rapidly increasing popularity of the small ball-shaped Dahlias is justified by their adaptability for both garden and house decoration. In the garden they are decorative plants of moderate size bearing an abundance of flowers. They also are particularly useful for home decoration, because their small size and daintiness lend themselves to highly artistic arrangements. We offer a very up-to-date selection of the best varieties.

Aimee. Well-formed blooms of an appealing bright salmon with rich apricot shading.

Amber Queen. Well-proportioned amber flowers.

Gretchen Heine. Rose tinted white, and tipped carmine. Free and long stemmed.

Joe Fette. A perfectly formed and reliable white.

Jonkheer von Citters. One of the daintiest and most interesting sorts. The petals are yellow, tipped red.

Little David. Brilliant salmon-scarlet flowers carried on strong, wiry stems.

Tubers of any of the Pompon Dahlias listed here: 15c each; \$1.50 per dozen; \$10.00 per 100.

Little Edith. Yellow with orange tips. One of the bright ones.

Morning Mist. This is a valuable addition to our collection of Pompons. The basic color is white but the tips of the petals are pink giving the whole flower a dainty light pink appearance.

Rose Willmouth. Quilled petals of pale rose.

Snowclad. A popular white.

Thilda Luz. A vigorous variety with substantial yellow blooms.

Tom Thumb. Deep garnet. Of even form and therefore most desirable.

Yellow Gem. A popular yellow variety.

Growers interested in Dahlias should make it a point to visit our fields and trial gardens at Riverton, N. J., in the autumn when Dahlias are in full bloom. The time spent to become thoroughly acquainted with the new varieties is well worth-while.

New Dwarf Dahlias for Forcing and the Garden

A new race of dwarf compact plants excellent for spring forcing and garden use, covered with flowers seldom more than four inches in diameter. Divisions potted in January and grown cool can easily be brought into flower for Mother's Day. They can be flowered in a limited way for Easter. We again offer green plants of these (ready in May) from three-inch pots. These will make good plants for garden use and, when dug and cured in the fall, will divide into fine stock for forcing purposes the following winter and spring.

The value of this type for greenhouse forcing to bloom for Mother's Day has been thoroughly established. Several large growers have been very successful with them. They require a temperature of about 60 degrees from January until flowering time.

We are in a position to supply a limited quantity of the following varieties in field-grown roots for this purpose. We particularly recommend Maria which is a decided improvement on Easter Greeting.

Christine. Pure white flowers of small size. Blooms profusely.

Easter Greeting. White flowers, larger and of better form than Christine but not so early.

Elsie

Elsie. Deep golden yellow passing to rich orange-carmine toward the tips. Of good size and excellent form.

Gertrude. Clean sulphur-yellow. Good sized flowers borne profusely on very compact plants.

Kate. Showy bright orange-scarlet flowers of formal contour.

Lena. Delicate pink.

Ursula. An intense crimson with carmine reverse. Flowers comparatively large.

New Dwarf Forcing Dahlia Maria

This variety is a decided improvement on Easter Greeting and in Europe it has already displaced that variety for forcing purposes. The strong, vigorous growth produces a superior, pure white flower. In our trials the past year it seemed also a bit earlier.

Any of the above:

Strong divisions of field-grown roots: **35c each;**
\$3.50 per dozen; \$25.00 per 100.

3-inch pot plants, ready in May: **25c each;**
\$2.50 per dozen; \$15.00 per 100.

May we suggest that you send us your order for Dahlias as early as possible since stocks of some of the better varieties are decidedly limited.

Six Popular Dahlias

Though every year brings us new and outstanding Dahlias, there can be no doubt that some of the older kinds have not been excelled. These six have proved most dependable in various sections of the country. They have the stamina and quality that makes them favorites with the public. All six varieties listed here represent free-flowering, vigorous kinds with healthy constitutions. Their colors are distinct and desirable, and they are offered at very reasonable prices. They are leaders in the New York and Philadelphia cutflower markets.

Gallant Fox. This New Jersey Dahlia is of outstanding merit. A perfect Formal-Decorative in form with six-inch flowers of an entrancing luminous dark red color which is described by some as claret, but defies definite description. The New York and Philadelphia markets absorb the cutflowers as fast as they can be produced.

DREER'S SELECT Hardy Perennial Plants

Specially Grown in Pots for Outdoor Planting

The majority of the stock offered is pot grown. This does not mean that the plants have been altogether pot grown but that they have been field grown, dug, and potted up during the fall months. Such stock can be planted even late in the spring with practically no loss, whereas clumps seldom do well when planted late in the season. Our experience has been that a vigorous pot plant of proper size will, in nearly every case, give quicker and better results than the best so-called "field clumps."

Hardy Garden Chrysanthemums

No plants in our gardens attract more attention in the fall of the year than these Hardy Garden varieties. Blooming, as they do, after practically all other garden flowers have passed away, they enliven the autumn landscape with their brilliant flowers so profusely displayed. With reasonable care they are absolutely winter hardy and their acquisition brings a permanent addition to the garden.

In the following lists we present the result of over a quarter century of painstaking selection and hybridization. While many old favorites may be missing, you may rest assured that they have been replaced by varieties which have proved superior in some desirable characteristic. We believe we have the most worthwhile collection of this class of plants in commerce.

Wholesale prices quoted are for strong 2-inch pot plants ready for delivery after March 1st.

Extra Early Double Large-Flowered

While all the varieties offered by us are early flowering, the following bloom from one to two weeks earlier than the general collection.

- Abundance.** A wonderful new salmon-red with golden reverse. Exceptionally free flowering, compact plant.
 - Aladdin.** Sensational early bronze. Because of its tendency to bloom during the summer when Chrysanthemums cannot produce good flowers due to the heat, we advise keeping the plant pruned back until early August.
 - Carrie.** A most satisfactory deep canary yellow.
 - Glomero.** Medium sized orange. Very profuse.
 - Glorietta.** Very double ball-shaped light pink. Dwarf and free.
 - La Somme.** Very dependable early mauve-pink.
 - Lorelei.** Double yellow of dwarf compact habit.
 - Marie duPont.** Very dwarf with large pure white flowers.
 - Natoma.** Very bright pink. Dwarf and free.
 - Sunkist.** Exceedingly free-flowering bright orange. Dwarf.
 - Tasiva.** Large free-flowering pure white of compact growth.
 - Yellow Normandie.** Early large yellow.
- Any of the above, 2-inch pots: \$1.00 per doz.; \$8.00 per 100.

Large-Flowered Double or Decorative

These varieties produce flowers from 2 to 4 inches in diameter and come into full bloom by the middle of October.

- Chestnut Burr.** Deep chestnut red. Resembles a chestnut burr in size and color. Very dependable.
 - Cydonia.** Double flowers of an unusually brilliant orange mahogany. One of the brightest in our collection.
 - Ganna.** Large free deep bright pink.
 - Golden Charm.** One of our newest creations. Very double, deep yellow flowers completely covering the dwarf compact plant.
 - Granny Scoville.** This is one of the very superior varieties. Large coral bronze flowers of excellent form.

 - White Doty.** Large ball-shaped white variety. Very popular.
 - Yellow Doty.** Same form and habit as Lillian Doty and White Doty, but with deep bronzy yellow flowers.
- Any of the above 2-inch pots: \$1.00 per doz.; \$8.00 per 100.

Chrysanthemum—continued

Small Aster-Flowered and Pompon Chrysanthemums

Under ordinary culture and without disbudding these will produce flowers under two inches in diameter. Their small size does not in any way detract from their effectiveness in the garden, and the dainty flower clusters are particularly useful for table and room decoration.

Adironda. Early golden bronze.

Captain E. H. Cook. Tall deep rose.

Cheerfulness. Makes large plants of excellent form, covered with hundreds of small double yellow buttons.

Any of the above, except where noted, 2-inch pots:
\$1.00 per doz.; \$8.00 per 100.

Russell Hybrids. The wide publicity given to these new Lupines in all the leading gardening papers of this country and abroad is bound to result in a great demand for this outstanding new strain. The Russell Hybrid Lupines have proved the most beautiful hardy Lupine ever developed. A Gold Medal awarded by the Royal Horticultural Society of Great Britain in June 1937 is ample proof as to what English gardening experts think about it. The plants grow into well-rounded, well-branched bushes, each developing a number of extra-large spikes closely set with blooms. One of the most outstanding features of this strain is the range of beautiful colors—deep yellow, orange, red, and brilliant bi-color combinations never heretofore seen in hardy Lupines.

New Pink Buddleia—Charming

Probably the most outstanding new plant offered this past season. It was awarded a Silver Medal by the Pennsylvania Horticultural Society. A glorious shrub bearing throughout the late summer and autumn elegant long sprays covered with lovely lavender-pink blooms, which compared with other Buddleias introduced up to date, are distinctly pink. For September and October flowers we suggest pinching off the first flower spikes in July to aid in development of the side branches which will bring a greater abundance of flowers during the autumn. 3-inch pots \$4.00 per doz.; \$30.00 per 100. Or 2-year-old field-grown plants, 18 to 24 inches tall, at the same price.

Lining out stock, 2-inch pots, ready April 1st, \$18.00 per 100; \$150.00 per 1000.

Buddleia Dubonnet

DUBONNET BUTTERFLY BUSH

Again this season we are fortunate in being able to offer our customers an entirely new color in Buddleia. The color is an exact counterpart of the popular French wine Dubonnet, a shade which has recently been popularized in dress fabrics. In sunshine and under the lamp it glows almost a true red. The firm cylindrical spikes are snugly set with individual flowers of good size that do not sunburn. The plant is of robust erect growth with strong stems. The leaves are large and of firm leathery texture. A good late summer outflower harmonizing well with other outdoor blooms.

3-inch pots, ready April 1st, \$8.00 per doz.; \$65.00 per 100.

2-inch pots, ready April 1st, \$6.50 per doz.; \$50.00 per 100.

Buddleia—Ile de France

This fine Buddleia, a French introduction, has quickly replaced the older varieties of this shrub which have been popular for so many years, because it is superior, not only in its brilliant coloring but the flower spikes are longer and more graceful. The plants also are of a better, more uniform shape.

The plant attains a height of from 3 to 4 feet, forming a symmetrical, bushy shrub. Every branch is terminated by a graceful, cylindrical spike 6 to 9 inches long. The fragrant flowers are brilliant rosy violet-purple. In bloom from the latter part of July to late in September.

3½-inch pots, \$2.50 per doz.; \$15.00 per 100.

Cotoneaster

Horizontalis. A low-growing shrub with almost horizontal branches. Small shiny green leaves and orange-red berries produced in great quantity and remaining on the plants well into the winter. One of the most effective evergreen plants for rockery. And excellent arranged in clumps in front of the shrubbery border or mixed with the dwarfier broad-leaved evergreens. 5-inch pots 60c each.

Daphne cneorum—Garland Flower

A pretty, dwarf, spreading shrub from 6 to 8 inches tall, valuable for the rockery or for the front of the border. Has beautiful bright pink, sweet-scented flowers early in May. Strong bushy plants 8 to 10 inches in diameter. 80c each; \$3.00 per doz.; \$65.00 per 100.

Elsholtzia Farquhari

This plant has the nature of the well-known Buddleia, but it grows only 24 inches tall producing large, showy spikes of bright pink flowers in late summer and early fall. The entire bush, flowers and foliage, is sweetly scented. In addition to being very conspicuous in the landscape the plant also is outstanding for cutting and deserves much more attention than ordinary plant material. We highly recommend this for cut flower purposes or for landscape planting. Strong field-grown plants 35c each; \$3.50 per doz.; \$25.00 per 100.

Red-Leaved Japanese Maple

Acer palmatum atropurpureum. The most conspicuous of the medium-sized shrubs or small trees. Their beautiful shape and brilliant red foliage add color and variety to the landscape during spring and early summer. Strong plants, 18 to 24 inches tall, \$1.75 each.

Osmanthus—Holly Osmanthus

Aquifolium. A beautiful, strong growing, Holly-like shrub with evergreen dark green, shiny, crinkly, spiny-toothed foliage. Attractive not only in summer but throughout the winter. Naturally grows in a shapely bushy form, usually from 5 to 8 feet tall. Strong plants, 15 to 18 inches tall, \$1.50 each.

There is no other fruiting evergreen shrub that is so attractive throughout the year as this Firethorn. It will succeed in any fairly sunny position, developing into a shapely plant 6 feet or more tall. Its large trusses of white flowers are followed by brilliant orange-scarlet berries which remain on the plants throughout the winter. 6-inch pots, 75c each.

Vitex—Chaste Tree

Macrophylla. In general habit similar to *V. Agnuscatus* but much stronger in all parts, the foliage being larger while the trusses of rich lavender-blue flowers are fully double the size. It blooms from July until frost, and is becoming as popular as the Butterfly Shrub. Plants 15-18 inches tall, \$3.50 per doz.; \$25.00 per 100.
